

## About

Since 2014, over 6,000 organizations have trusted Teramind to provide workforce productivity analytics and optimization and business process engineering in addition to insider threat detection through endpoint monitoring. By harnessing behavior analytics, our award-winning platform has helped enterprises in finance, retail, manufacturing, energy, technology, healthcare, and government improve their workforce processes and safeguard their sensitive data against threat.

## What We Offer

### Insider Threat Prevention

Counteract data misuse, malicious activity and exfiltration attempts with automated responses that combat insider threats to data

### Behavioral Data Loss Prevention

Strengthen your defensive posture by protecting sensitive data through endpoint monitoring and behavior analytics

### Privileged User Monitoring

Secure data against the malicious and accidental missteps of users that have the most access and can do the most damage

### Incident Forensics

Redefine the way your organization operates. Get the behavioral data you need to overhaul processes with granular precision and boost efficiency

### User and Entity Behavior Analytics

Keep your enterprise protected in today's complex threat landscape with user and entity behavior analytics validated by machine learning

### Fraud Detection

Defend company and customer data against misconduct by leveraging field-level data analytics to detect and prevent fraudulent activity

Insider threats  
have risen by

**47%**

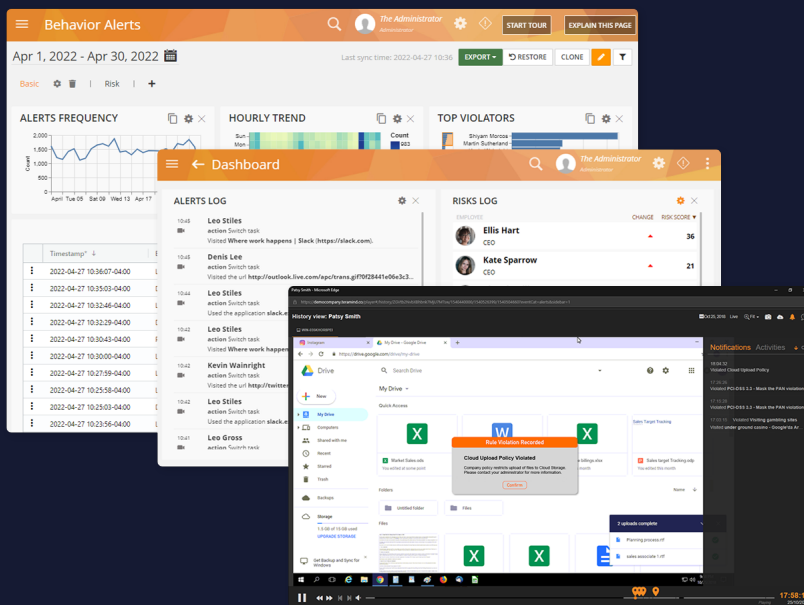

in the last  
two years

## Did You Know?

Insider incidents have risen 47% over the last 2 years.

Teramind's highly customizable platform can detect virtually any user activity that happens on an endpoint to protect against insider threats while content-based data exfiltration prevention safeguards sensitive data

## Insider Threat Prevention

- Detect and thwart attacks in the moment with real time threat prevention
- Predict oncoming threats with intelligent risk assessment

## Behavioral Data Loss Prevention

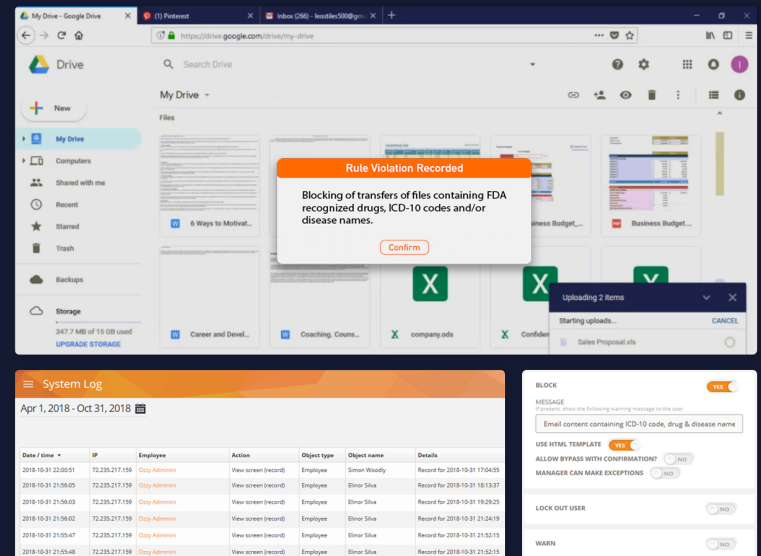

- Prevent malicious and risky activities with automated responses
- Protect and monitor the most sensitive & confidential company data

## Privileged User Monitoring

- Visually record every action a privileged user makes on your IT systems
- Utilize Teramind's automated policy and rule engine and real-time alerts to monitor privileged user workflow

## Incident Forensics

- Enrich security operations with contextualized data
- Conduct detailed investigations and collect irrefutable evidence

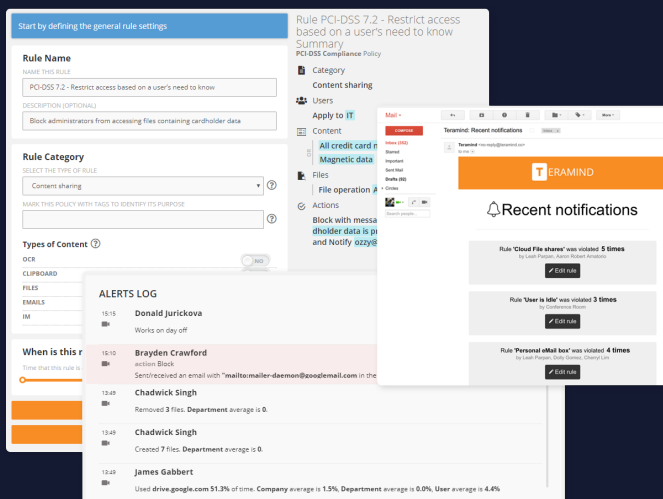

## User and Entity Behavior Analytics

- Detect anomalous behaviors in any activity on any endpoint
- Exposes irregularities in system and user activities with an advanced analytics

## Fraud Detection

- Protect company data that's most at-risk for being targeted by malicious insiders
- Cutting-edge in-app field parsing technology to analyze fields in your custom apps for fraud
