

# SecurCentral (XDR)

Next-Gen Extended Detection and Response with SIEM Capabilities.

SecurCentral, DataComm's XDR, provides advanced threat detection and response capabilities across your organization's endpoints, networks, and cloud environments. With SecurCentral, you can rapidly detect and respond to even the most sophisticated cyber threats, minimizing the risk of data loss, system downtime, and other adverse impacts on your business.

***“The average cost of a data breach in the US in 2022 was \$9.44 million”***

- 2022 IBM Data Breach Report

## Why Choose SecurCentral XDR?

- Advanced Threat Detection**  
 SecurCentral uses advanced machine learning and behavioral analysis techniques to identify threats that traditional signature-based detection methods may miss. With real-time visibility into endpoint, network, and cloud activity, SecurCentral can detect threats across your entire infrastructure, including advanced persistent threats (APTs), fileless malware, and ransomware.
- Rapid Response**  
 Our XDR enables rapid response to threats with automated incident response playbooks - customized to meet your organization's specific needs. With SecurCentral, you can quickly contain threats, isolate affected systems, and remediate issues to minimize the risk of data loss and other negative impacts.
- Centralized Management**  
 SecurCentral provides centralized management of endpoint, network, and cloud security. DataComm monitors all aspects of your security operations from a single pane of glass, simplifying administration and reducing the risk of misconfigurations and other errors.
- Cloud-Ready**  
 SecurCentral was purpose-built to work seamlessly with cloud environments, providing visibility and protection across cloud workloads and cloud-native services. With SecurCentral, you can secure your cloud environments while maintaining the flexibility and scalability that cloud computing offers.
- Seamless Integration**  
 DataComm's solution easily integrates with existing security tools and infrastructure, reducing the complexity and costs associated with deploying and managing multiple security solutions
- Scalable and Flexible**  
 Our XDR is designed to scale with your organization's needs, providing the flexibility to adapt to changing threat landscapes and security requirements.
- Compliance**  
 SecurCentral helps you achieve compliance with industry and regulatory standards. Your organization can meet compliance obligations and fulfill your security and data protection commitment to your clients.

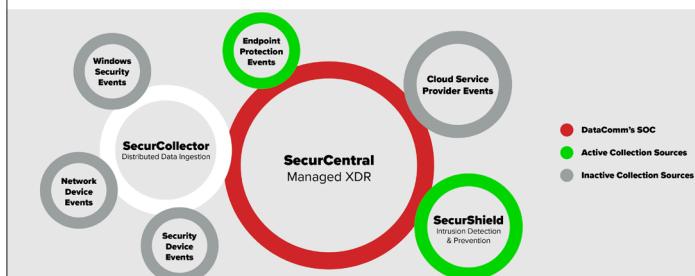

## Benefits

- A dedicated team of security experts
- 24x7x365 log monitoring
- Two years of raw log retention
- Immediate Critical Alert notification & incident response
- Real-time alerting & notification
- Compliance reporting to meet FFIEC, FDIC, OCC, NCUA, GLBA, HIPAA, & SOX
- An augmented view of changes on your network
- Comprehensive monthly reporting

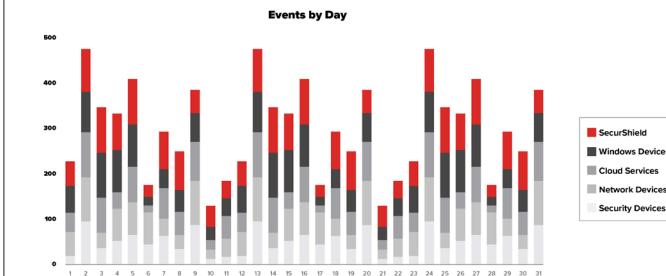

## Supports

- Windows, macOS, and Linux Endpoints
- Major Public Cloud Environments (AWS, Azure, GCP)
- Virtualized Environments (Microsoft Hyper-V & VMware)
- Cisco Routers, Switches & Meraki APs
- Cisco, Fortinet, SonicWall, WatchGuard, and Meraki Firewalls
- Sophos Endpoint Protection
- Integration with Many SIEM, EDR, and Network Security Solutions

## 03 SecurCentral Executive Overview

## 03 SecurCentral Executive Overview

***"The average time to identify and contain a security breach is 277 days, with 207 days to identify the breach and 70 days to contain it."***

- 2022 IBM Data Breach Report

## Why Choose DataComm?

- **Experience:** DataComm has over 20 years of experience providing security solutions to organizations of all sizes and industries. Our team of security experts has the knowledge and expertise to help you develop a customized security solution that meets your specific needs.
- **Flexibility:** DataComm understands that every organization has unique security needs. That's why we offer flexible solutions, custom-tailored to meet your institution's requirements. Whether you need a standalone EDR solution or a comprehensive security platform that includes endpoint, network, and cloud security, DataComm can help.
- **Partnership:** We are committed to building long-term partnerships with our clients. We work closely with our clients to understand their business and security needs, and we strive to provide solutions that help them achieve their goals.
- **Technical Support:** We offer comprehensive technical support and professional services to ensure successful implementation and ongoing management of our XDR Solution. Our team of certified security experts is available 24/7 to provide guidance, troubleshoot issues, and help optimize your security operations.
- **Value:** Our competitive pricing and flexible licensing options help you get the most value from your security investment. With SecurCentral, you can achieve advanced threat detection and response capabilities without breaking the bank.
